Teams of four trainees compete in leading a five-year project portfolio: selecting projects, prioritizing them, reacting to risks and opportunities, and making decisions in a dynamic serious game. Exchanging with a professional trainer and learning-by-doing reinforce the acquired technical and managerial skills.

Prerequisites

- Basic knowledge of project management;
- Basic knowledge of project financial indicators: NPV, payback, and cash balance.

Taking part in the educational game enables the trainees to acquire technical and leadership experience:

- Knowledge of the key challenges of managing a portfolio of projects;
- Understanding the scarcity/bottleneck of portfolio finances, resources, and time;
- Ability to balance/prioritize strategic value, NPV, cash balance, payback, and others;
- Ability to implement changes, and to react to risks and opportunities;
- Ability to use the soft skills to lead teams/an organization successfully;
- Ability to make decisions in a group, including in stressful situations.
